Ural State Mining University – Russia	September 2003 – July 2008
<i>Bachelor's: Information Systems and Technologies</i>	

PROJECTS

Simplified version of the kijiji website	www.dorf.alyamkin.ca
Website for microbrewery company	www.greenbrewbrothers.alyamkin.ca
React application for films nomination	https://lyamkin.github.io/the-shoppies-react-app
One-page web site. Web design and CSS	www.adventure.alyamkin.ca

WORK HISTORY

Cryptologic Inc., *Data center Operator, Montreal*

December 2017 - March 2020

- Contributed to and led projects in the deployment, maintenance, and support of current and new data center infrastructure.
- Led complex troubleshooting and resolved critical or escalated technical issues over a population of affected equipment.
- Helped test and troubleshoot new complex hardware components and designs.
- Configured and troubleshoot OS-related issues on equipment.
- Used diagnostic tools to identify hardware failures and replace non-functional components.
- Installed equipment for data communications networks including cabling, routers, switches.

Achievements:

- Redesigned and rebuilt with a group of engineers the computer network for more than 10 000+ rigs. The new design was more robust against hacker's attacks.
- Developed with team of developers a customized and flexible monitoring system for controlling rigs.

Used tools and technologies: HTML, CSS, MySQL, JavaScript.

Cellular Network “Motiv”, GSM/LTE operator, *Network Operations Analyst, Russia*

November 2011 – June 2016

- Monitored and analyzed radio wireless system performance, such as network traffic, security, and capacity.
- Produced monthly health reports using advanced excel spreadsheet functions.
- Developed database objects, including tables, views, and materialized views using SQL.

Achievements:

- Developed a Web User interface for displaying radio network statistics. It allowed the team to analyze data two times faster and more efficiently in comparison with the old approach.

Used tools and technologies: JavaScript, PHP, HTML, CSS, MySQL.

Cellular Network “Motiv”, GSM/LTE operator, *Computer Network Technician, Russia*

April 2010 – November 2010

- Installed equipment for data communications networks including routers, switches, cabling, wireless routers, and telephone systems.
