Montreal, QC

PROFESSIONAL SUMMARY

Aspiring Full-Stack Web Developer with experience in software development solutions using the latest technologies and frameworks such JavaScript, Java, C#, React. Enthusiastic about front-end and back-end development at the same time. Keeping myself apprised of industry trends and constantly looking for possibilities to leverage new technologies to accelerate development.

Recently graduated and opened for opportunities to join a highly collaborative and high-performing team of web developers.

KEY SKILLS

JavaScript	HTML/CSS	SQL, MySQL
Java	Bootstrap, Materialize	Trello
C#	React	Linux
PHP	Git, GitHub	

EDUCATION

John Abbott College – Montreal, QC   September 2020 - September 2021
Internet Programming and Development

Vanier College – Montreal, QC   January 2020 - May 2020
Web and Database Programming

ComIT – Winnipeg, MB   June 2017 - September 2017
Java development

Ural State Mining University – Russia   September 2003 – July 2008
Bachelor's: *Information Systems and Technologies*

Cryptologic Inc., *Data center Operator*, Montreal   December 2017 - March 2020

- Contributed to and led projects in the deployment, maintenance, and support of current and new data center infrastructure.
- Led complex troubleshooting and resolved critical or escalated technical issues over a population of affected equipment.
- Helped test and troubleshoot new complex hardware components and designs.
- Configured and troubleshoot OS-related issues on equipment.
- Used diagnostic tools to identify hardware failures and replace non-functional components.
- Installed equipment for data communications networks including cabling, routers, switches.

Achievements:

- Redesigned and rebuilt with a group of engineers the computer network for more than 10 000+ rigs. The new design was more robust against hacker's attacks.
- Developed with team of developers a customized and flexible monitoring system for controlling rigs.

Used tools and technologies: HTML, CSS, MySQL, JavaScript.

Cellular Network "Motiv", GSM/LTE operator,   November 2011 – June 2016
Network Operations Analyst, Russia

- Monitored and analyzed radio wireless system performance, such as network traffic, security, and capacity.
- Produced monthly health reports using advanced excel spreadsheet functions.
- Developed database objects, including tables, views, and materialized views using SQL.

Achievements:

- Developed a Web User interface for displaying radio network statistics. It allowed the team to analyze data two times faster and more efficiently in comparison with the old approach.

Used tools and technologies: JavaScript, PHP, HTML, CSS, MySQL.

Cellular Network "Motiv", GSM/LTE operator,   April 2010 – November 2010
Computer Network Technician, Russia

- Installed equipment for data communications networks including routers, switches, cabling, wireless routers and telephone systems.
